### **DETAILED ACTION**

This office action is in response to applicant's pre-appeal brief request for review filed October 11, 2005. The finality of the previous office action and indicated allowable subject matter is withdrawn.

### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Timothy Bliss on November 9, 2005 to distinguish applicant's invention over the prior art.

The application has been amended to the claims filed November 9, 2005 as follows:

#### **CLAIMS**

In claim 40, line 6 after "of" insert- -vertical- - and in line 8 after "covering" insert- -the islands of--.

### ***Allowable Subject Matter***

Claims 34-38, 40, 41, 43 and 44 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not disclose or make obvious forming a bond pad structure including interlocking

Art Unit: 2813

vertical islands structures separated by openings that form interlocking grid structures and covered with a contiguous barrier of tantalum nitride with a pad formed in the openings, over the interlocking structure and over the barrier.

In contrast to bond pads of the prior art as shown for example in Kim et al. (U.S. 6,255,586) whereby openings are formed in a single passivation layer without creating separated vertical islands or use of contiguous tantalum nitride barrier covering the islands. The lack of a barrier in Kim suggest that the metallic materials used for the pad and underlying conductive layer were compatible and therefore the use of a barrier would not be made obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art discloses in: e.g. Lopatin (U.S. 6,320,263) and Russell (U.S. 6,218,732) the use of either titanium nitride or tantalum nitride for a barrier to prevent unwanted diffusion; e.g. Fujiki et al. (U.S. 5,736,791) the use of a pad formed over islands separated by spaces.
